## Tiller Matches Held Monday

Despite bitterly cold wind and snow a large number of farmers were present at the field day at the Leo Ohlhauser farm on Monday. The event was sponsored by Drumheller and District Agricultural Society and the local committee in charge of arrangements was Russell Snell, chairman, Ted Schmidt, Ed Foster and John A. Ohlhauser.

Tool bar, tiller and disk matches were conducted with Charlie Cheshire, government field engineer, judging the competitions and following are the winners of each event:

Tool bar match: 1st, Renold Neher with a John Deere; 2nd, Adam Buyer with a Graham-Hoeme; 3rd, Norman Ohlhauser with a Victory blade.

Tiller match: 1st, Gottlieb Schell with a Massey Harris; 2nd, Ben Ziegler with a John Deere; 3rd, Karl Schuler with a John Deere.

Disk match: 1st, George Ziegler with a Massey Harris; 2nd, Fred Ohlhauser with a Cockshutt; 3rd, Leo Ohlhauser with a Massey Harris.

Snow forced cancellation of the machinery demonstration and the remainder of the program was devoted to lectures held in a building on the Ohlhauser farm. Here Mr. Cheshire gave an informative talk on the competitions held, giving the reasons for each placing and the adjustments necessary for a better job.

Others who spoke briefly were Matt Schmaltz of Beiseker, Bill Macdonald of Grainger, president of the Drumheller and District Agricultural Society and W. S. Backman of Three Hills, field supervisor of Kneehill M. D. N. Fred Bell, district agriculturist of Drumheller, was also present.

## Students Receive Awards In I.O.D.E. Essay Contest

Presentation of awards was made to winners of the annual I.O.D.E. Empire Day essay contest at a ceremony in the Carbon Scout Hall on Wednesday afternoon, May 23. Judging of essays was done by the Carbon school teachers and Mrs. Ed Ohlhauser, I.O.D.E. educational secretary presented ribbons to the winners in the following classes:

Grade I, Lorraine Holmes.  
Grade II, Betty Fox.  
Grade III, Kaaren Mortimer.  
Grade IV, Gail Schmierer.  
Grade V, Wayne Garrett.  
Grade VI, Ruth Drexler.  
Grade VII, Dennis Barr.  
Grade VIII, Shirley Hay.  
Grade IX, Audrey Martin & Mary Flaws.

High School, Margaret Schmierer, Marjorie Leiske and Mary Majessi.

The presentation of awards was preceded by a program of songs, recitations and reading of the prize winning essays.

## Farm Prices And Incomes

**LIVING COSTS HAVE RISEN STEADILY** in the past few years and the cost of living index reached a record figure this spring. Incomes in general have risen also, although not always in proportion to the rise in prices. In 1950, the national income was \$14,164,000,000, the highest in the history of this country and eight per cent. above the figure for 1949. Salaries and wages in the same year totalled \$8,300,000,000, which was six per cent. more than the earnings for 1949. This increased income was accompanied by increases in consumer spending. In the past year, Canadians spent \$11,800,000,000, while the value of goods produced was estimated at \$17,700,000,000.

### Blame Drop In Prices

Farmers did not share in the general rise in income levels in 1950. In that year the net farm income in Canada dropped from \$1,513,000,000, the figure for 1949, to \$1,424,000,000. This was a decrease of six per cent. in one year and of nine per cent. from the total for 1948. Increased operating expenses and lower initial prices for wheat were given as causes for this drop. The volume of agricultural production in Canada is now twenty per cent. higher than it was before 1939, although farmers have been hampered by shortages of labour and other essential needs, and by constantly rising prices of supplies and equipment. Since 1946 the farm labour force here has decreased by 170,000.

### Not Sharing In Increases

The drop in farm incomes in the face of rising costs and of rising incomes in other industries will be reflected in the Canadian economy. In the past three years 120,000 farmers and farm workers have left the land because of the insecurity of farm incomes. Too often the farmers are blamed, by an uninformed public, for the rise in food prices, and it should be realized that they are not sharing in the general rise in incomes at the present time. The question of floor prices for farm products and of farm prices generally is a wide and complex one and is frequently before farm organizations and governments. The demand for Canadian wheat and other farm products is likely to remain high in the coming years, and in view of the importance of this work, farm incomes should follow the trend of those of other industries, rather than fall behind as they have in the past two years.

### ARCHIBALD McLEAN

#### Manitoba Pioneer Of Riel Rebellion Days Passes On

Another chapter in the history of one of Manitoba's pioneer families was brought to a close recently with the death of Angus Samuel Archibald McLean, 76, of Winnipeg.

Mr. McLean was born at Fort Qu'Appelle, Sask., and when a lad of 10 years he, along with his parents and brothers and sisters, were held prisoners for 63 days by Indians during the Riel rebellion of 1885.

At that time his father, W. J. McLean, who served as a Hudson's Bay company factor for 50 years, was stationed at Fort Pitt, Sask. The Crees, under Chief Big Bear invited

the factor to a parley half-way between their camp and the fort, gradually drawing him further away until they captured him.

He was forced to write a letter to his wife telling her and other civilians at the fort to come to the Indian camp with their families as the tribe planned an attack if the soldiers did not leave voluntarily. The McLean family was unharmed but was held captive until released by the militia.

Because of this incident in his life, the factor was often referred to as "Big Bear" McLean by his friends and associates. He died in November, 1929.

For a while Angus McLean lived in Minneapolis, but after his wife died he returned to Winnipeg.—Winnipeg Free Press.

### Funny and Otherwise

Joe and Jim were in a speedboat racing across the bay at top speed, narrowly missing other boats in their path. Finally, Jim confessed to Joe, who was at the wheel, that he got frightened every time they had one of their near-hits. "Why don't you do what I do then, and you won't get frightened," answered Joe. "Just close your eyes."

The minister was placing a long distance telephone call.

"Is this a person to person call?" the operator inquired.

"No," replied the pastor, "it's parson to parson."

Pop: "You never kiss me except when you want money."  
Mom: "Well, isn't that often enough?"

Sign spotted in a baker's shop window:

"Pies Like Mother Used to Make—30 Cents."

"Pies Like Mother Used to Think She Made—60 Cents."

"So you're married! Did you have a honeymoon, Malinda?"

"Ah suppose you might call it dat, ma'am—Ephraim done helped me wid de washin' de first week."

"Why don't you take him into partnership?"

"Well, he was engaged to my wife before I married her. I'm not taking on a business partner who's smarter than I am."

When asked to compose an essay on Quakers, an eight-year-old wrote: "Quakers are very meek, quiet people who never fight or answer back. My father is a Quaker, but my mother is not."

Wishing to insure his hay ricks, Farmer Hodge called upon the insurance agent in a neighboring town.

"What facilities have you for extinguishing fire in your village?" asked the agent.

"Well," said the farmer, "it rains pretty often."

### Drop Bombs To Create Lakes

WINNIPEG. — U.S. navy planes bombed parts of the Rosseau game refuge and public hunting grounds in northern Minnesota on May 24 and 26 to create miniature lakes for wild life.

Works Minister William Morton was notified of the plan by Minnesota state officials.

Main part of the game reserve is immediately south of Sundown, Man.

State officials said 16 large bombs were dropped.

### WEED CONTROL PROGRAM TO COVER 20 MILLION ACRES

EDMONTON.—More than 20,000,000 acres of prairie farm land is expected to be covered by chemical weed control programmes this year, a director of the National Grain company said.

The director, F. P. Heffelfinger, of Minneapolis, said 13,500,000 acres were covered last year.

He said chemical weed control has played a major part in improving western crop conditions.

The Germans are thought to have originated fencing as a sport about 1330.

### PEGGY

—By Chuck Thurston

## Exempt U.S. Farm Workers From Wage Controls

WASHINGTON.—The government exempted about three-quarters of the United States' farm workers from wage controls.

The Wage Stabilization Board

ruled that farm employers may raise wages freely so long as the increases don't boost pay rates above 95 cents an hour.

William M. Hepburn, a public member of the wage board, told reporters the rule freed from 75 to 80 per cent. of all farm workers from stabilization rules.

Japan's population is more than 83,000,000.

**SETS NEW SPEED MARK**—Mrs. Jacqueline Auriol, daughter-in-law of French President Vincent Auriol, is credited with setting a new world aviation speed record for women. She officially averaged 509.245 miles an hour in a 100 kilometer (62.1-mile) flight. The previous record of 469.549 miles an hour was held by Jacqueline Cochran of the U.S. One of the leading French women flyers, Mrs. Auriol is the wife of the president's son and the mother of two small sons.—Central Press Canadian.

### DEMAND FOR CHICKS

SASKATOON.—The high cost of beef and pork has created a strong demand for cockerel chicks, says secretary Jack Longstaff of the Saskatchewan Hatchery Association. The cockerels are raised as meat birds.

My best recipes taste better made with **MAGIC!**

### CHEESE CORNMEAL FINGERS

Mix and sift into bowl, 1½ c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ¼ tsp. salt. Cut in finely 3 tbs. chilled shortening and mix in ¾ c. yellow cornmeal, ¾ c. shredded cheese and 2 tbs. chopped parsley. Make a well in centre, pour in ¾ c. milk and mix lightly with a fork. Knead for 10 seconds on a lightly-floured board and roll out to ¼" thick rectangle; cut into 12 fingers and arrange, slightly apart, on greased baking sheet. Bake in hot oven, 425°, about 15 mins. Serve hot with butter or margarine. Yield—1 dozen fingers.

Food Tastes So Much Better

**Blue Bonnet MARGARINE**

And costs so much less to prepare!

Of course you know how delicious Blue Bonnet is as a spread for bread or toast. Fresh! Delicious! Country sweet! Why not enjoy this extra goodness in all your cooking, too?

Pan fried foods are beautifully browned, crispy, and flavorful—every time!

Perfect seasoning for vegetables just as delicious when melting-hot, as when fresh from refrigerator!

Light, tender cakes are yours every time with Blue Bonnet! Perfect for the icing, too.

Sauces for fish and vegetables turn out so smooth, taste so delicious—and cost so little to prepare!

All your pastry is made feather-light and flaky so much more easily with Blue Bonnet Margarine!

Only Blue Bonnet Margarine comes packaged 2 convenient ways!

1. In the economical regular-type package with convenient color wafer in every box!
2. In the exclusive new Blue Bonnet Yellow Quik bag! Just press the color button... knead the bag... and delicious Blue Bonnet is colored ready to use in 2 minutes flat! No messy mixing! No dishes to wash! No waste! Ask your grocer for Blue Bonnet Margarine in whichever package you prefer.

Product of the Makers of FLEISCHMANN'S YEAST • MAGIC BAKING POWDER and other fine food products.

# Inflation Hits British Nobility

For \$35 A Week You Can Rent A Room In A Castle

Parliament has had to go to King George's assistance in bearing expense of maintaining Buckingham palace.

By JERRY KLEIN  
(CPC Correspondent)

British austerity, which has been denting the pocketbooks of blue-blooded nobles as well as those of the common folk, has upset the budget of King George VI himself.

He complained to parliament that the \$1,148,000 a year he'd been receiving wasn't enough in a country where the average worker has doubled his income since the start of World War II, and prices had taken a corresponding upturn.

The King said he'd been able to tuck away a dollar or two during the war, but that rising prices had exhausted those savings.

Saddened by the royal family's financial woes, parliament said it would shoulder about \$110,000 of King George's expenses, including upkeep of his Yeomen of the Guard, the cost of his telephone calls and telegrams, as well as maintenance of the King's palaces.

Money troubles have been plaguing

many of England's nobles lately, but parliament has not agreed to help them. Therefore, they've been forced to do un-royal things to keep body and title together.

The Duke of Norfolk, for instance, sold his house in London, together with its furnishings, which included a cool ton and a half of gold dishes. The sale netted him \$1,200,000—which should last him awhile.

Hastings William Sackville Russell, Marquis of Tavistock, Baron Russell of Thornhaugh and Baron Howland of Streatham, the 12th Duke of Bedford, was hard hit by the rising cost of coal and candles for the family homestead.

So he announced that anyone willing to pay \$35 a week can move right into the palace with him — no questions on family background asked. And the \$35 includes meals, too.

Paying guests in the Bedford's palace at Woburn, Bedfordshire, would make the present duke's father spin in his grave. The 11th duke, who died in 1940, was a quiet man who seldom entertained even guests of the non-paying variety. He was always prepared to do so, but somehow they seldom showed up.

The duke kept 60 bedrooms always ready for anyone who might drop by to spend the night, and he had 60 others in reserve. When the old duke died, a butler and six footmen served him.

The present duke inherited \$18 million from his father, but apparently has disposed of it nicely and now needs some more. Incidentally, the 12th Duke of Bedford—in case you're interested in taking up his offer—is regarded as an odd one. He's a great student of birds and is noted for the breeding of parrots. He's one of England's foremost pacifists, almost never rides to hounds, and is recognized by his shiny blue suit and ragged tweed hat.

When the sixth Duke of Portland saw his bank account dwindling, he gave up his palatial home in London's Grosvenor Square and it's been converted into a string of apartments. Today only one of Portland's estates, Welbeck, is used, and others stand empty. They're just too expensive to keep going.

Portland has taken the pinch like a gentleman. "A greater number of people have a stake and an interest in the land than before, which should make for stability," he said.

The Duke of Westminster, whose dukedom is the youngest in the realm, has been forced to make an odd dollar by letting the public in to have a look at his estate.

But perhaps being forced to evacuate just one of your palaces or putting a few paying guests in a few of say, 120 bedrooms isn't too hard on a nobleman. According to a recent survey, the average duke, while he had 2.2 children, had 3.6 homes and about 45,000 acres of land.

That gives junior about 20,000 acres to go fly his kite in. It also means less than one child in each household. With housing as cramped as it is, that can be a distinct advantage.

## Teachers, Mothers Blamed For Short-Sightedness In Children

LONDON. — Short-sightedness in children is often the responsibility of the mother and the school teacher.

So says Optician Otto Rasmussen after a two-year investigation into short-sightedness among schoolchildren in Kent.

Writing in a trade journal, Rasmussen blames "overworked teachers who appear to have no time to clean chalk dust off the blackboard and even less time, with large classes, to write large, legible words and numbers."

Rasmussen says that thousands of normal-sighted children have to strain their eyes in badly-lit classrooms to see blackboards. They are then rushed to clinics unnecessarily "because they could not read illegible characters in semi-darkness."

Mothers encourage short-sightedness by attaching dolls and rattles to pram and cot, close to babies' eyes. A child then becomes accustomed to seeing things at close quarters.

To Live Right — Eat Right

## Musical Horns For Diesel Locomotives

OTTAWA. — The strident horn of the Diesel locomotive is going musical.

It will be happy news for Canadians living near railway crossings, whose repose has been a major casualty of the sleep-shattering shriek of the Diesels.

Recently, an order from the Board of Transport Commissioners decrees that horns on "road" Diesels—those on runs between cities—must get in the groove musically. Within a year, they must be "tuned in chords of not less than three tones to produce a harmonious sound."

Further, the air-operated horns are to be made to sound like steam-engine whistles. That's because several crossing accidents have followed automobile drivers mistaking them for factory whistles.

## Sees First Movie At 91, Enjoyed It

NANAIMO, B.C. — A 91-year-old Scottish lass has just seen her first moving picture. Appropriately, it was a film of Scotland in Technicolor, and Miss Margaret Belaney, who is blessed with good eyesight, thoroughly enjoyed it.

Happy over the experience, Miss Belaney is ready to go to the movies again. Longevity runs in her family. An uncle lived to be 97 and another relative to 93.

This deal featured some interesting bidding and play. North opened One Diamond and forced with Three Clubs over South's response of One Heart. South marked time with Three Diamonds. North bid Three Hearts and South Four Hearts. North now bid Four Spades as a slam try, and after such strong bidding South was right to call Six Hearts. West led a dummy ruffing with ♠ 10. South's Spade holding was a liability, so at trick 2 he led ♠ J from dummy and let it run, content to lose to ♠ Q and ♠ A. A could cope with a Spade continuation. West, however, rose to the occasion and played ♠ 2. Dummy's ♠ A followed, and when East failed a two-trick defeat was inevitable, with one trump and two Spade losers.

More children are killed by rheumatic fever and rheumatic heart than by any other disease.

## Paint For Children's Toys And Furniture

The Canadian Paint Varnish and Lacquer Association is giving wide publicity to recent developments in connection with special lead-free paints for use on toys and furniture used by children.

Reputable manufacturers of such equipment will use nothing but the paints which are specially formulated for the purpose, and which contain no lead. Yet, says the Association, often when furniture and toys are repaired, parents will not adopt sufficient care and will use any paint which they happen to have on hand. If the material in question contains lead, the life of the child may be placed in jeopardy. Before undertaking any such "paint-up" program, therefore, it is best to consult a hardware, or paint store and obtain a lead-free product.

The Association draws particular attention to the long-range program of research which the Paint Industry has undertaken to overcome lead-poisoning. Some of the most recent developments have been with Cadmium sulfide and Cadmium sulfoselenide pigments. Tests were conducted using two hypothetical children who might consume these pigments either in paint or in chalk in fairly large amounts each day over extended periods.

It was learned that if a baby consumed all the paint from the inside of its crib once every six months over a period of several years, the effects of the Cadmium sulfide pigment would not even be apparent.

In the case of the chalk-eating child, where the chalk contained cadmium sulfide pigments no ill-effects were noted even though the child ate an entire stick of chalk containing 33.3 per cent. of the pigment every day he attended school over a period of several years. However where the pigment contained selenium there was a slight depression of appetite, possibly due to taste aversion, otherwise there were no ill-effects.

The industry is continuing its test with other pigments. Yet it points out that all the laboratory tests in the world cannot replace vigilance on the part of parents of young children. This is extremely important for Canadian medical authorities state that even in the case of lead poisoning, which usually occurs during the teething period in young children between the ages of one and two-and-a-half years, two to four months of nibbling on lead-bearing paint are usually required before any acute symptoms arise. If a child is discouraged in the early stages of such practice, all danger may be avoided.

Japanese typewriters contain 2,000 characters.

## HERE'S HEALTH

Little Bo Peep just couldn't sleep  
No matter how hard she tried  
She was quite unaware 'twas stuffy air  
That kept her open eyed.

Dept. of National Health and Welfare

## TRY AND STOP ME!

By BENNETT CERE

A pupil of Rossini brought the master a composition and said, "Maestro, I wrote this march in honor of Beethoven's death. What do you think of it?" Rossini studied the composition carefully and sighed, "If only you had died and Beethoven had written the march!"

Colleagues in various sections of the country have come up with these suggestions for amendments to the definitions in standard dictionaries:

Commuter: Traveler occasionally seen at his home or office.

Compliment: The applause that refreshes.

Forger: A scoundrel who gives a check a bad name.

Goblet: A small sailor.

Intuition: Something that tells a woman she is right whether she is or not.

Mass Psychology: Doing it the herd way.

Pickpocket: A gent who believes that every crowd has a silver lining.

Titian: The color a red-headed salesgirl's hair becomes the day after her father strikes oil.

Underrate: Seven.

## GROWING PAINS!

## On The Side : By E. V. Durling

Suppose you think you can write a popular song? Don't let anybody discourage you until you have given it a try. Mrs. Helen Wartenberg, 70-year-old Londoner, and her dearest friend, Lily Beadell didn't. They wrote a song and entered it in a contest. It won the first prize of \$2,800. It has since earned \$56,000 in sheet music royalties alone. The name of that song is "Cruising Down the River".

### English Gals Win Out

"French can-can girls. Imported from Paris?" That's one of the features Lou Walters announces for his new Latin quarter show. Most of the girls who do the can-can in Paris shows are English. That's because there are so few French girls with streamlined legs. It is claimed for the English girls that they have the most beautiful legs in the world.

### Nylon News

Nylons are now being sold in threesomes. The three stocking unit is referred to in advertisements as "a pair and a spare", and retailed with the slogan: "Wear the pair, carry the spare and have no care."

### The \$64 Question

In one guessing contest the prize offered a \$100 a month for life or twenty thousand dollars in cash. Which would you take if you won? I would go for that a hundred a month in cash. You would need forty thousand dollars to get that much annual income in a safe investment.

### There's Still Hope, Gals

At what age should a woman who has never been married be classed as an "old maid"? asks a twenty-six-year-old married feminine subscriber of Toledo. In Paris when a bachelorette reaches the age of twenty-five she considers herself in that class. On St. Catherine's Day some of the twenty-five-year-old girls stage a parade, an event which definitely has a "we wanna get married" angle. These girls are referred to as Catherinettes, which certainly is a more attractive term than "old maid". Still, girls of twenty-five or over who are not married should not feel too self-conscious about it. Yvonne de Carlo, considered by many to be the most beautiful girl in the world, is twenty-six. And she has never been married.

### Weaker Sex

Women make better pearl divers than men. That's because females have sounder lungs and can better stand being under water for longer periods than males. Also because women can better endure being in cold water. This is just one more of those things which inspire men to smile cynically when they hear women referred to as "the weaker sex".

### Words Of Wisdom

Most marriages still take place in June. This is said to be because male resistance as to matrimony is at its lowest ebb in the spring. If a girl cannot get a man to propose in the month of May, it is time for her to start being concerned as to the extent of her appeal to the male sex. It has been our annual custom at this time of the year to bring to the attention of our bachelor clients a few things men of experience have said about marriage. It was Socrates who observed: "By all means marry; if you get a good wife you will be very happy, if you get a bad wife you will become a philosopher."

**STUDENTS BECOME FORESTERS FOR A DAY**—Seven students of the 300 from Brockville, Ont., schools who turned forester-for-a-day are shown planting one of the 18,000 young red pine trees they planted during their annual outing in Limerick Forest, northeast of Brockville. In group are, left to right: Don McDade, Jack Fox, Gerritt van Veldhuisen, Fred Mallory, Barbara Hunter and Gordon Grierson. Sheila Hooker is shown holding one of the young red pines, while Art Walroth, Ontario department of lands and forests, offers advice.—Central Press Canadian.

**CANADIAN STUDENTS VISIT LAKE SUCCESS** — Four Canadian high school students and their conductor, Ken Watts, are shown as they sat in on a meeting of the United Nations committee on the status of women at Lake Success, New York. The trip was sponsored by a Toronto department store. In front are (from left): Mr. Watts, Elizabeth Miller and Willa McCauley. Rear: Charles Black and Douglas McCulloch.

**BARRED FROM COUNTRY**—The Netherlands recently classed Dr. Hewlett Johnson, the "Red" Dean of Canterbury, (above), as an "undesirable alien" and barred him from entering the country. The Dean, noted for his pro-Soviet views, had been scheduled to address a "peace committee" meeting.

**WINS GOLD CORD**—Blind King's Scout Clarence Morris, (right), of Belleville, Ont., is shown being presented with the coveted Gold Cord by W. L. Currier, deputy chief commissioner of Canada's Boy Scouts. Each Scout must earn 18 proficiency badges before qualifying for the award. The blind boy has been a Scout since November, 1947, and has made remarkable progress in earning his badges. Scout Morris is a patrol leader in his troop and an instructor in knots and Morse code.

**KOREAN OFFICER BRIEFS RIDGWAY** — Commander of the first R.O.K. division, Brig-Gen. Kong Moon Bong, (left), is shown briefing commander Gen. Matthew Ridgway during Ridgway's recent visit to Seoul during an inspection tour of Korea.—Central Press Canadian.

**TRANSFERRING WOUNDED CANADIANS**—This United States helicopter is shown landing at the Battalion headquarters of the PPCLI, somewhere in Korea, where it picked up Acting Commanding Officer Maj. Pat Tighe of Victoria, who directed pick-up of wounded members of the Battalion. Casualties are carried in pontoon-like "side cars" on the helicopter. Major Tighe has taken charge of the Battalion in the absence of Lt. Col. J. R. Stone who is flying to his home in British Columbia owing to a critical eye condition which his two-year-old daughter Moira has developed.

**U.S. CONGRESS ACTS FAST IN VET CASE**—Resting after a throat operation, David R. Arellano, Jr., 21, a U.S. Korean war veteran, is comforted by his wife at the Pima county hospital, Tucson, Ariz. Arellano made the headlines when he was denied treatment at a Veterans Administration hospital at Tucson by Col. J. E. Gaines, manager, because he had not served in a recognized war. Col. Gaines said he had refused admittance to Arellano because the Korean affair is not considered a war. It took U.S. congress only three hours to pass legislation to give Korean veterans the same medical and pension benefits as survivors of other wars.—Central Press Canadian.

**... AND SHE WON** — Some months ago there was reported to be disagreement in the British royal family over a Parisian evening gown made especially by a leading designer for Princess Margaret. Dowager Queen Mary and Queen Elizabeth banned the gown as too revealing. Now it seems that the princess has finally won her point, as shown by this strapless creation as she attended a benefit ball recently.

**CONCERN FELT OVER KING'S HEALTH** — Glittering with regal splendor, his majesty the king and members of the royal family are pictured in the ceremonial box as his majesty officially opened the royal hall of the festival of Britain. Left to right are: Princess Elizabeth, the Duke of Edinburgh, the Queen, the King and Princess Margaret. Members of the royal family, in the background, are unidentified. Many persons are concerned about the King's health after seeing him at the festival functions.—Central Press Canadian.

**FIRST CIVILIAN SUIT IN 11 YEARS**—Unfamiliar-looking, in mufti, General Douglas MacArthur and his wife leave New York hotel to witness a baseball game between the New York Giants and the Philadelphia Phillies. It was the first time that MacArthur had donned civilian clothes since 1940.—Central Press Canadian.

from Vancouver or Victoria

First sailing May 26; then Wednesday and Saturday June 2 to August 29. See your local agent for full information!

**Canadian Pacific****Keep Farm Census  
Schedules Until  
Enumerator Calls**

In common with the rest of the 730,000 farmers of Canada, the farmers of this district have received through the mail copies of the agricultural questionnaire that is being used in the 1951 census of Canada. Anyone who has not received a copy may obtain one at the post office.

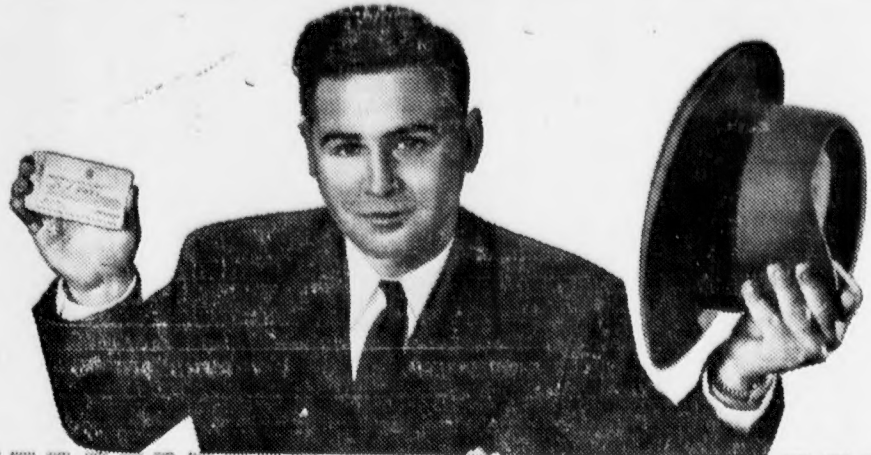

The farm schedule was sent out by the Dominion Bureau of Statistics in advance in order to enable farmers to prepare their answers to the questions at their convenience and thus save time when the census enumerator calls in June. An accompanying letter asked the farmers to complete the schedule so far as they could and have it on hand in readiness for the visit by the enumerator. They were particularly requested not to mail it to the Bureau of Statistics.

In spite of this request, several thousand farmers from all parts of Canada have completed their schedules and sent them to Ottawa. In consequence, the Bureau has sent out a special request to all Canadian weekly newspapers asking them to remind their farm readers to keep the schedule until the census taker arrives to complete the details and pick it up.

**"Fertilizer in Alberta"  
Bulletins Available**

"Fertilizers in Alberta" is the name of a recently revised bulletin published by the Alberta Advisory Committee, which may be obtained from your District Agriculturist or Field Supervisor. It contains useful information regarding the value of fertilizers and definite recommendations as to its use. All farmers who use fertilizer should have a copy, and be guided by the advice of the Advisory Fertilizer Committee.

—Have you had any visitors during the past week? Have you been host to any of the local organizations? We would appreciate having these news items and stories for publication. Send them in or bring them to the Carbon Chronicle office.

**Introducing your CENSUS TAKER**

Mr. R. J. Davy is one of the 18,000 enumerators who will call at the homes of all Canadians—including yours—starting June 1st.

His job is to get the facts which Canadians need for successful management of their private business or public affairs. It is of practical benefit to you and your community.

Your enumerator (man or woman) will carry an identification card. The information you give is kept in strictest confidence, and can be used only for census statistics. It cannot, by law, be revealed to anyone for any purpose, even to other Government Departments. Please be ready with quick and accurate information when your census taker calls.

**THERE'S A JOB TO BE DONE IN '51 HELP CANADA COUNT****9TH DECENNIAL CENSUS****JUNE, 1951****OIL MAKES A COUNTRY STRONG****THE ROUGHNECKS ARE MOVING ON!**

In the language of the oil fields, "roughnecks" are the men of the drilling crews who probe deep in the earth for oil. You'll find them in any oil field doing the hard tedious work that goes into the drilling of every well.

But roughnecks like it best when the going is toughest and most exciting—when they move on to search for oil where it has never been found. In Alberta the odds are against them, only one wildcat well in 20 is likely to be successful.

Working against these odds, roughnecks' drills have tapped more than a billion barrels of new oil in Alberta since 1947, bringing new prosperity and new security to all Canada. In fact Canadians now produce one in every three barrels they use—but we still must depend on foreign countries for the other two. To be self-sufficient we must have three times our present reserves.

The roughnecks keep moving on in the unending search for oil. As they succeed they benefit and strengthen the entire nation.

## Hints On Better Hitting

**Batting Stance:** A batter without proper stance is like a sprinter who doesn't use a crouch start. He has a strike on him right from the beginning.

The feet must be placed wide enough apart so that the body is in a perfectly balanced position from which to make the swing. To decide how wide a stance is best for the individual hitter, big league coaches often use the "arm between the knees" method.

Stand with your feet apart and your forearm parallel to the ground between your knees. The fingers should be extended. When your feet are adjusted so that the fingers touch the inside of one kneecap and the point of the elbow touches the other, then you will have your natural hitting stance for baseball. It may seem uncomfortable and too wide at first, but if you stick with it until you get the "feel" your batting will improve rapidly.

**The Swing:** As the ball approaches, your front elbow should be well away from your side, so that your swing is loose and relaxed. Keeping the elbow close prevents complete relaxation.

Just before the swing starts, the weight is placed on the rear foot, the rear leg is bent slightly, and the front foot is lifted for the step into the ball. The step should be about six inches long, although it varies with individuals.

The bent rear knee will help you get good shove-off as you swing, which brings the weight forward and into the ball. This is one of the big secrets of long-ball-hitting.

As you step into the ball, driving hard off the rear leg, the toes of the front foot should point straight at the pitcher. This helps "release" the rear hip, which must swing around sharply as the ball is hit. The forward leg is held rigid immediately after the step as a pivot around which the hips and upper body swing.

Never make the mistake of golfing at the ball—dropping the tip of the bat lower than the handle. Keep your bat parallel to the ground. The hips must be held level as they are swung around, otherwise they will upset this "parallel swing".

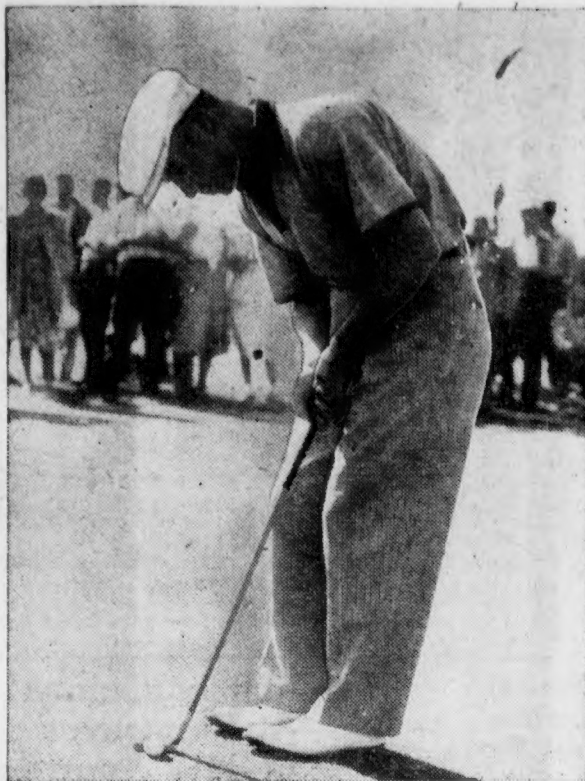

After the ball is hit the bat

should not be checked but allowed to follow through completely. The forward knee is relaxed and bent. The body and head should be kept over the feet and not pulled back and away from the ball during the swing. This is a common fault which upsets the balance of the batter. There should be no tendency to fall down; the batter should finish his swing in perfect position to get underway fast for first base. If you find yourself off balance at this point, check to see if you are "pulling away".

One of the fundamentals of good hitting, of course, is keeping the eye on the ball until it hits the bat. This is something that takes constant practice, simple though it may seem. Many hitters get careless and start taking their eye off the ball in the last few feet before contact is made. During hitting practice, work on each point outlined in the column one by one. But make sure you watch the ball right on to the bat every time.

Let Sports College help you improve your playing by following The Sports Clinic in this newspaper every week. You can obtain additional coaching hints and instruction by joining Sports College. Simply write a letter to "Sports College, Box 99, Toronto 1, Ontario." Membership is free, and you will receive a catalogue of training literature available with your membership card. Mention the name of this newspaper when you write.

Further coaching by famous athletes is carried by Sports College each Saturday on radio stations CBW, CBK, CFGP and CBX. Look up the time in your area and become a regular listener.

**PAID SIGNAL HONOR**—Stan Leonard, Vancouver, winner last year of the Canadian Professional Golfers Association title, who has been invited to play in the U.S.P.G.A. Match Play Championship at Oakmont, Pittsburgh, June 27 to July 3, inclusive. It is the first time that a Canadian has been extended such an honor.

## MANITOBA CIVIL SERVANTS TO WORK LONGER HOURS TO HAVE SATURDAY OFF

WINNIPEG.—Labor minister C. E. Greenlay announced changes in the Manitoba civil service act which will see administrative and clerical staff working 30 minutes a day longer Monday to Friday during July and August.

In return, civil servants, except for a small operating staff, will have Saturday off during the two-month period. At present, they work four hours Saturday morning.

America's only canonized saint is Mother Cabrini, whose statue was unveiled in the Church of St. Peter in Rome in 1946.

## World Happenings Briefly Told

The University of Delhi this year will introduce a four-year course for a bachelor of science degree in nursing.

A \$5,000 bequest to feed pigeons three times a week on two downtown street corners in Chicago was disclosed in the will of a wealthy widow.

Police play no favorites in Coventry, England. Detective Inspector R. Taylor was fined five shillings (72 cents) for allowing his chimney to catch fire.

Full-scale exploration and development has started on an asbestos deposit in the McDame Creek district, about 60 miles south of the Yukon-British Columbia border.

J. Lundberg, about 45, of Fort William, was killed when an aluminum ladder he was carrying touched 20,000-volt power lines on a Port Arthur waterfront grain elevator.

Darts players and some bow-and-arrow experts played an unusual game of darts in Reading, England. The archers stood 30 feet away while their opponents threw from the regulation nine feet. The archers won.

The owner of a Finnish steam bath wanted to show his gratitude to firemen who extinguished a grass fire next to his establishment, in Toronto. He offered the firemen a bath for half price. The offer is good any time.

Electric storms occur about once in 10 years at the North Pole.

## THIS CURIOUS WORLD By WILLIAM FERGUSON

## Quoting Odds

"A RADIATOR KEEPS A ROOM WARM, BUT IT KEEPS AN AUTO ENGINE COOL," says GEORGE DIFFENDERFER, Collingswood, New Jersey.

## Nothing Like A Fire Truck For Cross-Country Travel

Fire Chief H. M. Foreman, of Penticton, B.C., and his wife say there's nothing like a spanking new, red fire truck for cross-country travel. Other motorists always clear the road, but fast! The couple are driving the truck home from Boston, some 3,000 miles, to save \$700 in shipping costs. Leaving the east coast last Monday, they expect to reach Penticton by Thursday.

## Kitchen Meditations By JANE DALE

### LITTLE GIRL

Little girl, with chocolate on your face;  
With your baby curls all awry,  
Clasp each moment in your chubby hands  
For days go swiftly by.

Little girl, with dollies in a row  
And with tea things all set around,  
Play pretend with all your little friends  
While playtime may be found.

Little girl, with laughter on your lips;  
Dressing up and having so much fun,  
Don't hasten to grow up, be wise—  
For then childhood is gone!

## New Livestock Feeds Under Test In B.C.

### May Benefit Producers And Consumers

VANCOUVER.—New feeds for livestock now having their first practical tests in British Columbia may provide widespread benefits for producers.

And, consumers, too, may benefit. Greater production may mean lower prices.

The first tests of the so-called wonder feeds, antibiotics, now are under way on some of the largest farms in British Columbia, where research experts are watching progress.

The method used is to fortify standard feed with penicillin. Scientists aren't quite sure how the new substance works. Its feeding value was discovered by accident when pigs fed the mash from drug production, strictly as a salvage operation, showed startling early gains in weight.

Feeds supplemented with the new substance have been used on Fraser Valley turkey farms.

Clarence Landstrom, who raises 6,000 birds a year, reports good results.

At five cents a hundredweight extra for the penicillin added to a standard feed mixture, he has produced about 25 per cent. extra gain of weight in a pen of 250 poult.

The antibiotic-fed group showed a one-ounce greater gain per bird at two weeks old over the main flock fed ordinary rations. Usual weight at that age is five to seven ounces.

"Such gains become extremely important, say on 1,000 birds," said Mr. Landstrom.

Poults fed the new feed had better feather, showed much better general vigor and had a lower mortality rate. The mortality rate was only two per cent.

Tests of the supplemented feeds on hogs has just started on British Columbia farms.

### LOSE MUCH TIME

The average building trades worker loses from a fourth to a third of his available working time each year due to bad weather.

**EARTHQUAKE LEAVES CITY IN RUINS**—This street scene in Jucuapa, El Salvador, showing the demolished buildings was typical of the entire city which was almost totally destroyed by earthquakes that rocked the southeastern part of the country. At least 1,000 persons are known dead and thousands more injured and left homeless in the disaster.

## Not Enough Millionaires To Pay All Taxes

OTTAWA. — There aren't enough millionaires around, says Finance Minister Abbott, to pay all the taxes the government needs.

The money to pay increased defence and social-security costs must come from the every-day Canadian wage-earner, he told the Commons during study of budgetary resolutions boosting personal income taxes.

"It's no use saying you can get it from the millionaires," he said, "because there aren't enough of them."

That was his reply to a suggestion by Stanley Knowles (CCF—Winnipeg North Center) that individuals get a refund on the new 20-per cent. defence surtax when it reduces their incomes below a certain point.

## GEMS OF THOUGHT

### THANKSGIVING

Thanksgiving of the heart gives a fine freshness, a tingle, a tang to one's spirit that not only assures but increases victory.—S. D. Gordon.

While no offering can liquidate one's debt of gratitude to God, the fervent heart and willing hand are not unknown to nor unrewarded by Him.—Mary Baker Eddy.

God's goodness hath been great to thee. Let never day nor night unhallowed pass but still remember what the Lord hath done.—Shakespeare.

Enter into his gates with thanksgiving, and into his courts with praise: be thankful unto him, and bless his name.—Psalms.

Gratitude is one of those things that cannot be bought. It must be born with men, or else all the obligations in the world will not create it.—Lord Halifax.

Let us express thanksgiving to the Father for His loving-kindness to all His children, putting aside the false assumption that there has been any special providence watching over us and not over others. That is the better thanksgiving.—Rev. Dr. Willis Goldsmith.

## Helpful Hints

It doesn't make sense to iron clean laundry over a soiled ironing board cover. Wash the cover every two weeks or so, and the pad occasionally. Replace the cover while it is damp, so that it will dry taut to fit the board.

To remove fruit stains from the hands, moisten corn meal with vinegar and rub on the stains; or grease the hands with lard and then wash with soap and water.

When preparing the potatoes for boiling, instead of peeling the whole potato, just peel a narrow strip entirely around the middle of each potato, lengthwise. When cooked, the skins will slip off easily.

Be sure to protect the mirrors in your home from the direct rays of the sun, which cause spots and other blemishes.

**ANSWERS TO QUICK QUIZ**  
ANSWERS: 5. By 5.4 points. 3. Fishing and trapping. 1. 42.3 hours. 4. Welland, between Lakes Erie and Ontario. 2. \$80,000 per week. (Material supplied by the editors of Quick Canadian Facts, the hand-book of facts about Canada.)

## Empire Games At Vancouver In 1954 Approved

LONDON. — Approval has been given for the 1954 Empire games to be held in Vancouver, it was announced.

The announcement came from the British Empire games' federation, which also said it has agreed to a revised version of regulations governing the games.

Under the revised plan, scheduled to be submitted for approval to the federation's general assembly during the 1952 Olympic games at Helsinki, obligatory sports in the Empire games will be athletics, boxing, cycling, lawn bowls, rowing, swimming, diving and wrestling. In the 1954 games, there will also be weight-lifting and fencing.

Women's shot-put and discus events will be included in future games and there will be only one women's relay.

Regulations have been drawn up governing British Empire athletic records. These may be held only by athletes who are British subjects or citizens of a constituent part of the Commonwealth, and may be set up only within the empire and Commonwealth. Distances will be in English measures.

Prejudice is the reason of fools.

## Future Gloomy If Soil Conservation Is Neglected

WINNIPEG.—A gloomy picture of the future of civilization if it continues to neglect soil conservation was painted by H. J. Mather, of the Line North-West Elevator association, at a joint luncheon meeting of the civics and agricultural sections of the Winnipeg Chamber of Commerce.

"We rely on soil more than on anything else for food, clothes and shelter," said Mr. Mather. "In Manitoba we have already lost 1,500,000 acres of soil and we only had 9,000,000."

The speaker said that in some parts of Manitoba there is now only nine inches of topsoil where there once had been 18.

"The nutrition experts figure we need two acres of producing land per person. There are now 4,000,000,000 arable acres in the world and 2,000,000,000 people, so the proportion is all right at present. But population is increasing and we are losing soil."

Mr. Mather said continental pressure and propaganda were needed to make sure that proper conservation measures are taken. "Men from every walk of life must get behind this movement to ensure its success."

## Coalman Clean With Nylon Sacks

LONDON. — Housewives in east London couldn't believe it.

The coalman was clean and his sacks were white.

The explanation, as given by a nylon company spokesman:

"We have been experimenting with nylon coal sacks for some time. They are lighter, more supple and much stronger than the usual sacks and they can be hosed down for cleaning purposes."

Nylon overalls will also be widely used, the spokesman predicted.

Production of nylon stockings will not be affected because a coarse type of nylon is used.

## : Selected Recipes :

**FORK-TENDER**, browned veal steaks with tangy lemon sauce and green beans are a springtime treat. The sauce is best when made ahead of time and allowed to mellow to a perfect blending of flavors.

### VEAL WRAP-UPS

Four veal steaks, 8 links sausage, 1 large onion, 2 cups canned tomatoes, 1/2 tsp. curry powder.

Pan fry sausage, turning to brown evenly. Place two links on each veal cutlet. Wrap up veal to cover sausages, and fasten with a toothpick. Slice

onion in 4 crosswise slices. Pour off sausage dripping and lay onion slices in skillet. Top with a veal wrap-up. Pour tomatoes combined with curry powder over all. Cover and bake in moderate oven 350 degrees F. for about 1 hour. Remove cover during last 15 minutes of cooking.

## Athabaska Area Best For Uranium

The Beaverlodge and Black Lake district of Northern Saskatchewan's Lake Athabaska area are the best places in Canada to look for uranium, better than the Great Bear Lake area where the country's only producer of that atomic material is now located, according to B. S. W. Buffam and E. B. Gillanders, consulting engineers.

This information is revealed in a paper entitled Exploration and Development of Canadian Uranium Deposits prepared by the two engineers for Eldorado Mining & Refining (1944), the Crown company which operates the Great Bear Lake mine and which is now completing plans to bring a new mine into production in the Lake Athabaska district.

The paper is now available to the Canadian mining industry and is something of a blueprint on how to find uranium occurrences in Canada and prepare them for production. The four known areas in Canada are listed in order of their potential importance in the paper as follows: Lake Athabaska; Great Bear-Hottah Lake district; Theano Point district, Lake Superior; pegmatite deposits which extend from Georgian Bay to the Saguenay River.

The best way to follow up surface uranium finds, it is said, is by diamond drilling rather than by trenching and stripping. The holes should then be tested with a geiger probe. All uranium ores so far discovered in Canada have been given a large number of mill tests by the Federal authorities and most have been found to be amenable to treatment by standard methods. During the last few years more rapid and accurate methods of assaying have been developed and perfected.

Possibilities of uranium deposits extending to depth are good. Pitchblende is now being mined at a depth of 1,300 feet at Port Radium and it is expected to be found at much greater depth. In the Beaverlodge Lake district, diamond drilling has cut pitchblende at a depth of 900 feet below surface.

Underground development and mining costs will be comparable to those for other minerals, though many of the pitchblende veins now known are short and narrow, which increases development costs.—Toronto Globe & Mail.

## Canadian Fashion

**SUMMER SUIT**—Coat lining and wrap-around blouse are in matching striped shirting. Sheer blue cotton handled as if it were wool and lined with batiste.

## SMILE OF THE WEEK

Tram conductor: "Don't you see that sign 'No Smoking'?"

Male Passenger: "Yeah, but you can't do what all the signs say. There is one that says 'Wear Girly Girdles'."

## OUR COMPLETE SHORT STORY—

## THE FULL LIFE

He Had Seen Everything  
This World Had To Offer.

By Eugene M. Hanson

"I've seen the oceans of the world and most of its cities," said a corporal. "I was a sailor on merchant ships for fifteen years before the war. I have seen the native customs in nearly every land and I can express myself in seven languages. I've seen the bazaars of the Orient where slave girls are sold and I have seen the castles where great barons ruled in Europe. If I had my life to live over, I'd be a sailor again. It's been a full life."

A cluster of soldiers relaxed in a

thousand-year-old cellar. They were close to death. For the moment the past seemed more important than the future.

Spoke up another corporal, "I can't say I'm familiar with natives, but I know all the historic landmarks of the civilized world. I was a teacher and able to travel three months every year. The rest of the year I had enough leisure to study the countries I planned to visit. I couldn't ask for anything better."

One of the privates, the handsomest fellow in the group, stood up as he made his remarks, despite weariness. "I haven't seen all the world but I've seen all the United States," he declared. "I've seen New York and Hollywood. After that the rest seems unimportant, but I've seen it. I've travelled the length of the Mississippi by boat and I've visited every city in the country large enough to have vaudeville. I was a vaudeville entertainer, then I went into pictures. I don't see how I could have lived a richer life."

Next spoke the newspaper man. "It has been my privilege," he said, "to meet the most important persons ever to visit the city in which I was a reporter. On the other hand, I have known criminals, freaks and unfortunates of all kinds. I have seen how people live in all walks of life. I wouldn't want anything better than to get back my press card and continue where I left off when I joined the army."

"I've seen life even more intimately than any of you," declared the doctor. "Life at its very beginning. I have entered homes and viewed the naked motions of my neighbors. Young brides tell me their problems. Old men, their fears. I have seen strong men grow weak, and have helped weak men become strong. My profession has given me rewards which make me feel one of the luckiest of men."

"I've seen things from a different angle," declared the engineer. "My career has made me see more in the forces of nature than in the doings of man. I've seen the jungle, the desert, the towering mountains, great rivers dammed, and bridges thrown across torrents. I've seen mines tunneled deep into mountains, and roads blasted out of the faces of cliffs. I've seen nature in the raw and seen it conquered by man. The engineer's life is a full life."

"I haven't been around much. In fact, never was off the farm until I went into the army," declared a young lad. "But I think I've seen some pretty wonderful things. I've seen what the soil will do when given a chance. I've learned the terrible meaning of dry weather and the blessing of rain. If you look at it right, farming's a good life."

"Bah!" snorted the short man with thick glasses. "You all think you've seen life, but you've seen only a small part. I've seen everything all of you have mentioned and so much more that it would take all night to tell it. I've seen those common things and I've seen killings, weddings, high society, kings and paupers. I've seen fights, spies, diplomats and gangsters. I've seen—"

"Just a minute," interrupted the reporter. "Just what did you do before the war?"

Replied the short man with the glasses: "I operated the projection machine in a movie theatre in Summit, Oklahoma."

(Copyright Wheeler Newspaper Syndicate)

## DID YOU KNOW?

A codfish doesn't really have a tongue, but the small piece of flesh at the back of its mouth is known as its "tongue" by fishermen.

Rhinoceros "horn" is actually tightly matted hair.

CANADIAN! IN TOKYO — Enhancing the beauty of the Japanese cherry blossoms in a Tokyo party are these two flight nurses, Ensign Virginia Faeth, (left), a U.S. navy nurse, and Pilot Officer Isabel Zeigler, an R.C.A.F. nurse from Brandon, Man., who accompanies evacuee flights of Korean war battle victims to America.

## Use Own Judgment

CALGARY.—Judge M. J. Edwards in court here warned motorists not to rely too much on the automatic stoplights on the rear of cars in front of them as a signal to slow down.

## Stores Stay Open

WEYBURN, Sask.—The majority of Weyburn's stores were open Saturday night in keeping with the Retail Merchants association proposal to stay open on Saturday nights until the association can meet with the farmer organizations to make some mutual agreement.

## Makes Last Run

REGINA.—The man who fired the first railway engine from Fort William, Ont., to Transcona, Man., over the Grand Trunk Pacific in 1910 made his last official run from here. M. G. Covell, retiring after 44 years in railroading, will live in Burnaby, B.C.

## Seek Owner Of Gold Ring Left For Safe Keeping

VANCOUVER.—Two months ago a plain gold ring arrived here, sent by a woman in London, England.

In a letter accompanying the ring a Mrs. Sheila Rands, said it had been left in her keeping by a flying officer, Eric W. Erickson, who valued it highly as a gift from his mother.

Mrs. Rand said that Erickson's parents, to the best of her knowledge, are retired Winnipeg people now living in British Columbia.

The ring, showing faintly the initials "S. T.", is waiting at Mayor Fred Hume's office for ex-flying officer Erickson to come and get it.

But so far, all efforts to locate him or his family have been fruitless.

The mayor's office said that the ring would be turned over to the police department's bureau of missing persons.

## GAS SOLD IN ONTARIO FROM PIPED ALBERTA OIL

TORONTO.—Gasoline made from Alberta crude oil went on sale recently in Ontario for the first time. This follows the recent delivery to Sarnia refineries of oil carried by pipeline from Edmonton to Superior, Wis., at the head of the Great Lakes, and from there to Sarnia by ship.

The first "airmail" was carried by pigeons.

## Farmers Cut Wheat Planting By Million Acres

OTTAWA.—Canada's farmers have decided to cut wheat planting by 1,000,000 acres, but experts believe that providing the weather holds good, Canada still will have a lot more high quality wheat next fall than she harvested a year ago.

The bureau of statistics estimated farmers intend to plant 26,000,000 acres to wheat, compared with last year's 27,000,000. Greater concentration would be placed on seeding of coarse grains.

Last year, however, when Canada produced a near-bumper crop of 462,000,000 bushels of wheat, frost on the prairies reduced half the crop to low-grade, non-millable wheat.

The result was that Canada could barely find enough high-grade wheat to meet her export commitments. She had to turn down a lot of extra business.

This year, say the experts, prospects look better. Rarely does an unseasonable bout of frost hit twice in a row. And if yields are good, Canada should have enough high-grade wheat for overseas commitments as well as sufficient wheat to meet India's appeal for a gift of millable supplies to make flour for her starving millions.

Farmers decided, too, to cut down on the potato acreage to 454,700 acres from last year's 505,200. This probably results from east coast growers having had difficulty in marketing all of their last year's crop.

By contrast flaxgrowing farmers have reported intentions of planting 1,045,000 acres to flaxseed, double the 547,000 acres in 1950.

Coarse grain planting also is expected to be sharply higher, making for less summerfallow. The summer-fallow acreage was estimated at 20,275,000 down 700,000 from last year's 20,998,000.

## Yippee! DOUGHNUT TWISTS

Raised light and tender with new fast DRY Yeast!

• There's a new twist in doughnuts—a new thrill in all your baking! Say goodbye to perishable yeast—Fleischmann's Fast Rising Dry Yeast keeps full strength until you use it—fast-acting when you use it. Get a dozen packages—it keeps in your cupboard!

## DOUGHNUT TWISTS

• Scald  $\frac{1}{2}$  c. milk,  $\frac{1}{2}$  c. granulated sugar,  $\frac{1}{2}$  tsp. salt and  $\frac{1}{4}$  c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl  $\frac{1}{2}$  c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add cooled milk mixture and stir in 2 well-beaten eggs and 1 tsp. vanilla. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in  $2\frac{1}{4}$  c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough and roll out into a rectangle,  $\frac{1}{2}$ " thick; loosen dough; roll again to  $\frac{1}{2}$ " thickness. Cut into strips 7" long and  $\frac{1}{2}$ " wide. Fold strips in half, twist, then pinch ends together. Arrange,

well apart, on lightly-floured cookie sheets; grease tops. Cover and let rise until doubled in bulk. Carefully lift, a few at a time, into shortening that has been heated to 365°—hot enough to brown a cube of day-old bread in 60 seconds. When under-sides are browned, turn and cook second sides. Carefully lift from fat and drain on absorbent paper. Coat with a mixture of fruit sugar and cinnamon or brush hot doughnuts with the following syrup: Heat, stirring until the sugar dissolves, 1 c. granulated sugar,  $\frac{1}{4}$  c. butter or margarine and  $\frac{1}{4}$  c. water; simmer 5 mins., then stir in 1 tsp. vanilla; keep hot over boiling water—if syrup becomes too sugary, stir in a little boiling water and heat to boiling point. Yield—3 dozen doughnuts.

Note: Dough may be cut with an orthodox doughnut cutter; fry the doughnuts and the "holes".

—By Les Carroll

## THE TILLERS

## Fashions

That Magic Collar!

Anne Adams

Add TWO dresses to her wardrobe! Sew only ONE! A princess sundress for a hard-playing little pet becomes a princess Sunday dress in a jiffy. Just add collar. Scallop bonnet is easy to wash!

Pattern V4762 comes in sizes 2, 4, 6, 8, 10. Size 6 frock, 1 $\frac{1}{2}$  yards 35-inch;  $\frac{3}{4}$  yard contrast.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,  
Winnipeg Newspaper Union,  
60 Front Street W., Toronto.

## The Right Ingredients Make the Most Effective WEED-KILLER

33 weed-killing formulations tested on over 7,500 test plots . . . over 100,000 individual plot readings . . . proved the most effective 2,4-D ester weed-killer contains four ingredients, oil, coupler, emulsifier and ester. A formulation lacking any of these is inferior.

The same tests proved the effectiveness of the individual ingredients in the formulation. The result . . . Green Cross Weed-No-More "80" . . . with

**THE RIGHT OIL** — an oil which increases effectiveness without increasing danger of crop damage. Best of 200 oils tested.

**THE RIGHT COUPLER** — a coupler that maintains the formula in perfect condition, irrespective of storage or date of purchase.

**THE RIGHT EMULSIFIER** — an emulsifier that ensures good stability and allows fine, uniform distribution.

**THE RIGHT ESTER** — the butyl ester of 2,4-D is the best solvent for waxy coatings of weed leaves, and is the least volatile of the common esters.

Control Weeds in Your Grain or Flax with

**C. C. DIEDE**  
MASSEY HARRIS DEALER — B. A. OILS

Mrs. Andy Nowicki and three children of Stavely spent a few days last week at the home of her uncle, R.R. Thorburn.

Mr. and Mrs. Earl Ohlhauser motored to Calgary for the weekend.

Bill Fox, who graduated from university as an electrical engineer this year, spent a couple of days in Carbon with his brothers Ben and Ernie. Bill has accepted a position with the Westinghouse Co. at Hamilton, Ont.

The well being drilled for the village by Tom Beagrie of Swallow has struck water at a depth of 75 feet. No official test has yet been made but the potential of the well is estimated at between 30 and 40 gallons a minute. The well is located on the hill directly north of main street and was "witched" by Ross Fraser.

The Gamble Ladies' Aid will sponsor a Sale of Home Cooking and Aprons in the Egg Grading Station on Saturday, June 9, from 3 to 9 p.m.

The Salvation Army will be making its annual Red Shield Appeal in Carbon during the next week. The canvass in town will be made by Salvation Army personnel. Country residents who may wish to contribute may leave donations with S.J. Garrett.

Officers elected at a baseball meeting Tuesday evening were: Walter Permann, president; Francis Poxon, secretary; Jack Barr, manager; Les Gillespie, coach.

Mr. and Mrs. Charles Trumbley returned home Sunday after a week's holiday at the home of their son-in-law and daughter, Mr. and Mrs. Frank Grainger.

Alex R. McTavish, R.O., Graduate Optometrist, will visit Shaw's Drug Store, Carbon, on Monday afternoon, June 4th. Complete, dependable eyesight service.

### HI-SCHOOL HI-LITES

Carbon Coal Diggers lost an exhibition game to Acme on Sunday 9-4. We'll do better next time.

The game against Swallow on May 28 was cancelled and will be played at Carbon May 31.

The Band Concert again had to be cancelled because of weather conditions. Seeing the farmers have had enough rain we won't have them come.

A few high school students attended a graduation party at Acme Tuesday.

### CARD OF THANKS

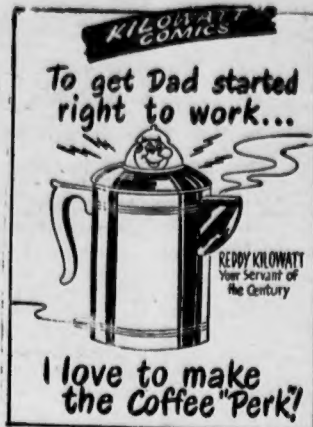

We wish to extend a sincere "thank you" to the Carbon Girls' Club for their lovely gifts of cameras and a doll.  
Frances, Diane and Lynn Bushby

### CARD OF THANKS

Mr. and Mrs. W. F. Ross again express their extreme gratitude to the many friends who honoured them at a farewell party in the Scout Hall. They are most pleased with the set of coffee tables and purse of money presented to them. Bill is extremely pleased with the gift, a clock, from the Carbon Curling Club. The pleasant evening, good wishes and gifts will be memorable.

### DISTINGUISHED FLYING CROSS

For "an act or acts of valour, courage, or devotion to duty performed whilst flying in active operations against the enemy" . . .

During the Second World War, the Distinguished Flying Cross was awarded to 4,028 members of the Royal Canadian Air Force.

" . . . exceptional fearlessness in the face of the enemy" . . .  
"outstanding courage and determination" . . .

4,028 citations—each one a tribute to service in the defence of freedom, by men of the R.C.A.F.

Today, in Canada's rapidly expanding Air Force, more young men are needed to train as Air Crew Officers—Navigation Officers, Radio Officers and Pilots.

To be eligible, you must be between 18 and 24—be a Canadian citizen or other British subject—be physically fit—and have Junior Matriculation or better.
